

JAKUB NIEDZIÓŁKA

SOFTWARE DEVELOPER

PROFILE

I am a passionate developer with the love for the code. I put all my effort into creating things that matter. For me, programming is like a silent poetry and we, as the authors, put beauty into it.

HOW TO REACH ME

MY HOBBIES

Besides programming (which is one of my hobbies), I am into music - I sing and make songs in various genre.

I also like getting knowledge about self-development. I try to imitate people who accomplished something in life with hard work and strong will.

CAREER SUMMARY

Full-Stack/Software Developer

Dalkia Polska Solutions | July 2019 to present

- developing application for impersonal reception in office buildings, integrated with external services, e.g. Amano Car Park.
Stack: PHP Laravel, MySQL, jQuery, Bootstrap
- developing application for monitoring energy consumption and costs. Application let users enter invoices and keep statistics about measures.
Stack: PHP Laravel, MySQL, jQuery, Bootstrap
- developing and maintaining applications reducing electricity consumption in buildings. These applications were integrated with Building Management Systems.
Stack: C++14/17, Qt, Embarcadero C++

SKILLS

I've started my journey with C++ and Qt and then switched into Web Apps - in company I've worked mainly with PHP Laravel. In my free time I keep learning React and NodeJS (accompanied with MongoDB).

I was responsible for contacting with client about new features in applications, as well as managing service requests, so I had possibility to strengthen my communication skills.
